- Dimensions after folding 100x60x10 cm
- Pipe diameter 25 mm
- Weight 3 kg
- Pallet packaging (40 pcs)

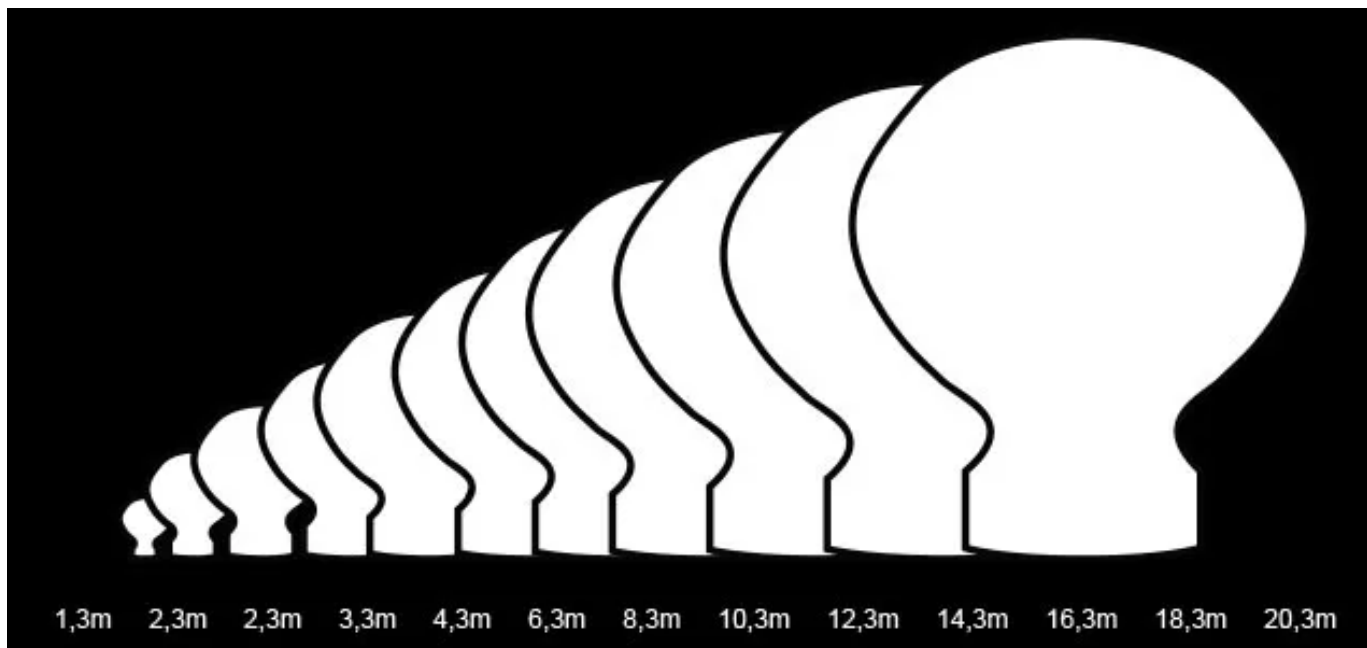

INFLATABLE BALLOONS

Due to its shape, the balloon takes up little space in the base, allowing more advertising space in the middle of the construction.

Unlike other advertising media, the logo is visible on each side of the balloon so that everyone can see your presence at the event.

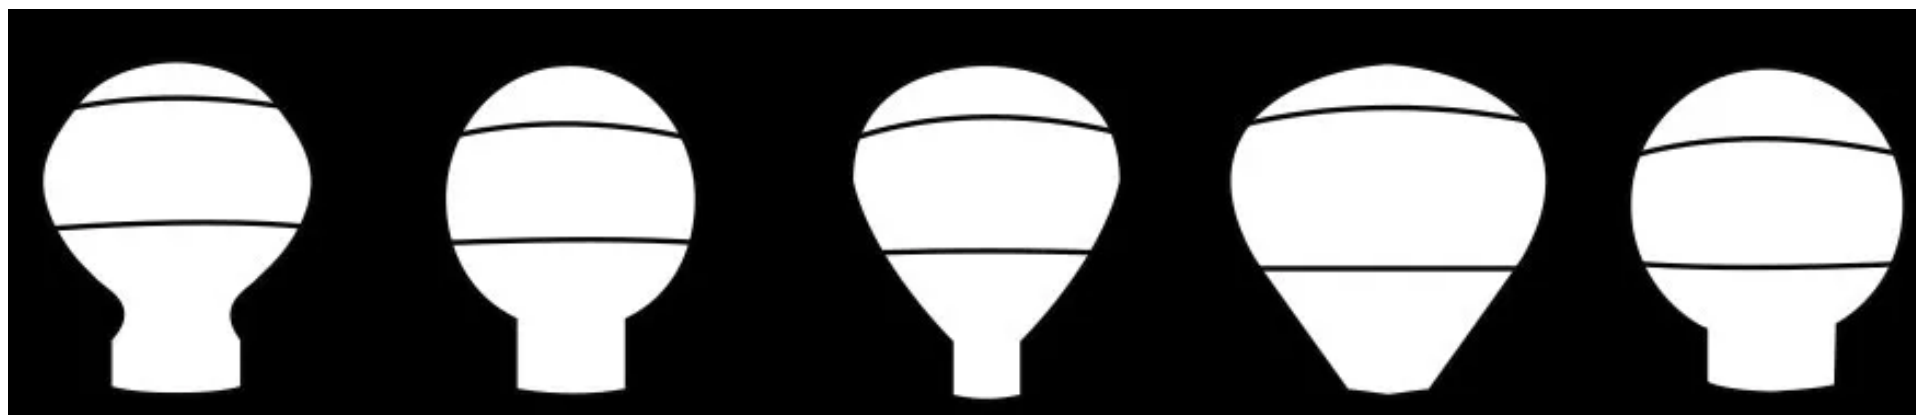

It can be of different sizes (see below) and shapes (see next slide).

INFLATABLE BALLOONS

Inflatable balloon, with its attractive shape, easy to use has become the most popular advertising medium used by every industry. It can be of different shapes (see below).

Iglo Standard 94-6n

IgloStandard 94-6n	
Total external surface*	94m ²
D - External width	10m
H1 - Maximal external height	6,2m
H2 - Maximal internal height	4,9m
Tube diameter	1,3m

IGLO STANDARD

Such constructions are based on an inflatable frame, which also functions as tent legs, roofs, as well as interchangeable side walls. Easy to use, along with superb durability are just two of the main features of Iglo Standard inflatable tents.

QUICKUP TENT

Innovative inflatable tents that do not require a permanent connection to the main power supply. These constructions are based on an inflatable frame (pumped-in air secured with a valve), roofs and interchangeable side walls.

	QuickUp Tent 3.1	QuickUp Tent 4.1	QuickUp Tent 5.1
H1	290cm	320cm	360cm
H2	190cm	200cm	220cm
W	310cm	410cm	510cm
